Answer: Circle the things that help protect water.

Trees

Plants and Grasses

Ducks and Wildlife

Picking up Garbage

Recycling

Using Reusable Water Bottles

2 Spot the Water Helpers

Answer: Circle the helpers that protect water.

Rain Barrel

Turning off the Tap

Planting a Tree

Reusable Water Bottle

Recycling

YOU DID IT!

Keep making good choices and stay a **Water Protector** every day!

Blue Community Schools ~ The Council of Canadians

Inspiring the Next Generation of Water Protectors

About the Program

Blue Community Schools is an initiative inspired by the **Blue Communities Project**, supported by water advocates, educators, and communities working together to protect water as a shared public trust.

The Blue Community Schools program helps students learn about the importance of water and how they can protect this vital shared resource.

Inspired by the global **Blue Communities movement**, schools are encouraged to promote three simple principles:

Recognize water as a human right

Students learn that everyone deserves access to safe, clean drinking water.

Promote public water

Schools celebrate and support safe public drinking water.

Reduce plastic water bottles

Students explore ways to reduce plastic waste by using reusable water bottles.

Through classroom activities, school initiatives, and student leadership, Blue Community Schools help young people become **Water Protectors** who care for lakes, rivers, and drinking water in their communities.

This colouring book is designed to help students learn about water protection and take their first steps toward becoming **Water Protectors** in their school and community.

Become a Blue Community School

Schools interested in joining the movement can learn more, access free resources, and apply online.
